

.NET Developer Intern

The Basics

Nextsense is specialized in driving complete digital transformation processes and delivering ICT solutions to improve the business performance of a wide range of organizations. We are always looking to hire highly motivated and ambitious individuals to join our amazing team of professionals.

You will

- Learn how to develop and implement web solutions in a timely and high-quality manner
- Actively participate in the entire software development lifecycle
- Work with a team to deliver features and improve architecture, using the guidelines of your mentor.

To qualify for the role, you must have:

- Final year student or Graduate in Computer Science, Engineering, or any other technical field
- Basic knowledge of .NET 4.5+, C#, ASP.NET MVC, WebAPI
- Familiarity with HTML, CSS, JavaScript
- Knowledge of databases
- Basic knowledge of Source control, Git, Feature Workflow, Pull Requests, and Merging
- Familiarity with .NET Core
- Good analytical and problem-solving abilities.
- Team player with strong communication skills, and a strong desire to learn new things

What we look for

We're interested in strong team players who can collaborate effectively and have a passion for learning and staying up to date with the latest technologies. Prospective interns should be highly-motivated self-starters and have a knack for analytical thinking that helps them problem solve.
